SUMMARY

Full Stack Web Developer with experience in building scalable web applications using React.js, Python, and Django. Currently working on an ABDM-compliant Electronic Health Record (EHR) platform as a SaaS product, leveraging multi-tenant architecture to support multiple users efficiently. Skilled in developing RESTful APIs, managing PostgreSQL databases, and deploying applications on AWS (EC2, S3, Lambda). Experienced in API testing, Docker-based environments, and CI/CD practices. Passionate about solving real-world problems and building reliable, high-performance systems.

PROFESSIONAL EXPERIENCE

- HlthTek Optimus**  02/2026
Software developer
During my internship, I work on developing and enhancing **Backend** and **Frontend** features for a web-based application. I build and integrate **RESTful APIs** using **Python and Django**, manage database operations and relationships, and implement role-based logic for different user types. I perform **API testing and debugging** using **Postman**, ensure smooth frontend-backend communication with **React and JavaScript**, and gain hands-on exposure to **Docker**-based development environments and basic cloud deployment workflows.
- Primacy Infotech**  09/2025 – 12/2025
UI/UX And Frontend Developer
I worked as a Designer and Front-End Developer, handling website designing and front-end development using HTML, CSS, and JavaScript. My role included creating responsive layouts, implementing UI designs, and improving user experience

EDUCATION

- Bachelor of technology in computer science** 2021 – 2025
Sister Nivedita University  Kolkata
- Higher Secondary** 2019 – 2021
Jamshedpur Women's College Jamshedpur
- Secondary** 2018 – 2019
PLSN Girl's High School Bihar

SKILLS

- Frontend: React.js | Next.js | JavaScript | HTML | CSS
 - Database: PostgreSQL
 - Tools: Postman | Github | VS code | Figma
- Backend: Python | Django | REST APIs
 - Cloud & DevOps: AWS (EC2, S3, Lambda) | CI/CD
 - Core Concepts: Data Structures & Algorithms | OOPs | System Design

PROJECT'S (FRONT-END DEVELOPMENT)

- HlthTek's Website**  02/2026 – 04/2026
Developed a full-scale company website using Next.js and JavaScript, focusing on building SEO-friendly and high-performance user interfaces. Implemented API integrations and applied SEO best practices to improve search visibility. Also worked on web crawling concepts to enhance data indexing and overall search relevance.
- Voice Writer**  11/2024 – 03/2025
Developing a machine and an app that transcribes spoken language into written text on different surfaces. Enhance functionality with features such as real-time voice transcription, generative AI, seamless app integration, language learning support, and customization options

DESIGN'S (UI/UX)

- Agri-Tech** 
Designed a Figma prototype for an Agriculture Farming application under a Smart India Hackathon problem statement, focusing on user flow, role-based access (buyer/seller), and a clean, intuitive UI.
- VoiceWriter** 
A UI prototype focused on converting speech into text in real time, with simple navigation and accessibility-friendly design. Created in Figma as a college project to visualize user flow, core features, and a clean, minimal interface for practical usage.

CERTIFICATES

- IBM'S Introduction to Cloud Computing:**  Gained hands-on understanding of cloud infrastructure components, service and deployment models, virtualization, and cloud-native development through a Cloud Computing Certification
